ANNUAL REPORT OF THE MEDICAL OFFICER
OF HEALTH FOR THE YEAR 1969

To the Chairman and Members of the Arnold Urban District Council.

Mr.Chairman, Ladies and Gentlemen,

Herewith my Annual Report for 1969.

The health of the district remains good. There were no major outbreaks of infectious diseases during the year. We had a reminder, however, of one increased risk modern conditions have created when we were involved in investigating an outbreak of Salmonella infection among passengers on a charter flight abroad. By the time the investigation began, the victims were scattered all over the British Isles, Belgium and Morocco. A more serious risk is run by people who go on holiday without being vaccinated against Smallpox, as many still do. Free inoculation is now offered to members of school parties going on holiday or study trips.

Clean Air

Real progress will be made when we are able to get clean air zones in the older built-up areas of the district. It is disappointing to have to report that this is being held up by a shortage of sold smokeless fuel.

Meat Inspection

My advice of last year that a full-time meat inspector be appointed still applies for the same reasons as were then put forward.

General

There has been a remarkable improvement in the efficiency of the Health Department, due largely to the initiative and good sense of Mrs.Heathcote. The other members of the staff as a consequence have obviously enjoyed their work and put their backs into it in an inspiring manner, for which I thank them.

Tuberculosis

The number of cases of Pulmonary and Non-Pulmonary Tuberculosis continued to be notified at a very low level - which is very pleasing, although I shall not be satisfied until no new cases are reported.

Vaccination against Tuberculosis is carried out yearly of all the 12 years old school population. In 1969, 438 of school children were skin tested for Tuberculosis, 401 of these had negative reactions and were vaccinated with B.C.G. Of the 22 children who showed positive reactions - all were X-rayed and found to be satisfactory.

IMMUNISATION AND VACCINATION

A regular monthly session for immunisation and vaccination is held at the Health Centre, High Street, on the 1st Friday of the month at 2.30 - 3.30 p.m. Approximately half of the immunisation procedures are carried out by General Practitioners and Assistant County Medical Officers in County Health Clinics within the area.

A new schedule of immunisation and vaccination was issued by the Ministry of Health in 1968. Immunisation against Diphtheria, Whooping Cough, Tetanus and Poliomyelitis beginning at six months of age with a longer interval between the injections. This should produce a better antibody response, and with the later age for starting greater protection will be achieved.

Subsidiary legislation with regard to notification of Infectious disease was introduced in 1968. (i.e., Notification of Infectious Disease Regulation 1968) a notable addition being Infectious Jaundice, only one case being notified during 1969.

359 children were protected against Measles by a single inoculation of vaccine in 1969 - making a total of 628 children protected in the area.

53 cases of Measles were notified during 1969 - the same number as 1968. Thanks to the Measles vaccine this number is very much less than we would have anticipated. Without vaccine we would have expected approximately 250 cases. Not only have the number of cases reduced but the unpleasant complication should be considerably reduced in number.

Diphtheria, Whooping Cough and Tetanus.

GENERAL PROVISION OF HEALTH SERVICES FOR THE AREA

Laboratory Facilities

The Public Health Laboratory, being the laboratory for the Notts. Area under the Public Health Laboratory Service carried out the following examinations:-

Milk:	Phosphatase Test, Methylene Blue Test Bacteriological etc.
Ice Cream:	Methylene Blue Test, Grading etc.
Food:	Bacteriological examination of foodstuffs
Water:	Bacteriology of water
Pathological Specimens:	Bacteriology and pathology of swabs, sputa etc.

The laboratory carries out many other functions but the above are the main ones the Department is likely to require. The service is a most excellent one and is available to the Medical Profession.

City Analyst's Laboratory

Similar examinations to the above are carried out in respect of milk, ice-cream and water. The laboratory is also able to carry out chemical analysis of food. Mr. E.R. Fogden is an official analyst for the purpose of the Food and Drugs Act 1955.

Ambulance Service

Two ambulances are stationed at the Arnold Station and are available for use in the Arnold Urban and surrounding districts. These vehicles are under the direction of the Notts. County Council Ambulance Control, Telephone No. 82603.

MATERNITY AND CHILD WELFARE SERVICES

Maternity Services

These services are supplied by the Nottinghamshire County Council.

CARE OF THE UNMARRIED MOTHER

A number of cases under this heading have been dealt with during 1969. Excellent co-operation exists between the Health Staff and the Southwell Diocesan Board of Moral Welfare.

All cases are admitted to Hospital in order that all necessary steps can be taken to rehabilitate the mother where necessary.

THE CHILD WELFARE SERVICE

All newly born babies are visited as soon as possible after discharge from the maternity hospital or after the midwife has ceased to attend and advice is given by the health visitor. All cases are encouraged to attend the Child Welfare Clinics. At all these clinics medical advice is available.

The following Clinics are held:-

Arnot Hill Park: (Health Centre, High Street from 1st January, 1970)

Monday, Wednesday, and Thursday afternoons.. .. 2-4.30 p.m.

REPORT OF THE
CHIEF PUBLIC HEALTH INSPECTOR FOR THE
YEAR, 1969

Health Department,
Arndt Hill Park,
Arnold.

To the Chairman and Members of the Council

Mr. Chairman, Ladies and Gentleman,

I have pleasure in presenting my Report for the year 1969.

SECTION 'D'

SANITARY CIRCUMSTANCES OF THE AREA

WATER

The whole of the district obtains its water from the Nottingham Corporation. The supply has been satisfactory in quality and quantity, has no plumbo solvent action and no complaints have been received.

SWIMMING BATHS

The Public Baths have been well conducted under the able supervision of Mr. W. Watson, Baths Superintendent.

No complaints were received by the Health Department as to unsatisfactory hygiene conditions.

Samples of water submitted to the Public Health Laboratory for bacteriological contamination were satisfactory.

DRAINAGE AND SEWERAGE

Foul sewerage from the whole of the built-up area of the Urban District is dealt with by the Nottingham Corporation at their disposal works, Stoke Bardolph.

RIVERS AND STREAMS

There are no Rivers or Canals within the District.

Five tributary streams drain the area:-

1. Gedling Road and Mapperley confluence via Arno Vale Road and Thackeray's Lane.
2. Coppice Road confluence via Bentwell Avenue and Brookfield Road.
3. Kingswell confluence via Nottingham Road Recreation Ground
4. Calverton Rd. confluence via Front Street and Nottingham Road
5. Redhill confluence via Mansfield Road to Jubilee Road

All converge into the Day Brook which in turn discharges into the River Leen at Bobbers Mill in the City of Nottingham, via the Valley Road Playing Fields.

CLOSET ACCOMMODATION

The position throughout the district generally is in my opinion entirely satisfactory in that a water carriage system operates to the extent of 100 per cent.

No more than 6 Pail Closets remain in outlying parts of the District.

CESSPOOLS

There are approximately 100 cesspools in the outlying parts of the Urban District, on the East, North East and Northern boundaries, where public sewers are not available. These are emptied by the Council on request twice a year (Spring and Autumn) at a charge of 30s.0d per 800 gallons. An income of £308. was received during the year for emptying cesspools; expenditure was £400.

PUBLIC HEALTH ACT, 1936. SECTION 75 (1) DUSTBINS

The system of replacing defective dustbins is as follows:-

Defective bins are reported by the refuse collectors; a letter is then sent to the owner requesting replacement of the defective bin. After a lapse of a reasonable time, a Statutory Notice is served on the owner giving him 28 days in which to provide same. 4 Statutory Notices were served during the year and 1 dustbin supplied in default.

Unsatisfactory containers such as wash-tubs, drums etc., appear from time to time. Where this happens, the premises are visited and the substitute receptacle is ultimately replaced for one of an approved pattern.

Two hundred and twenty new dustbins were provided at 66 private premises, 154 council houses and other council premises. 66 Preliminary Notices were served.
